The net expense ratio is 0.86%, as stated in the Fund's Prospectus dated January 31, 2024. The Fund's investment adviser has contractually agreed to waive fees through January 31, 2025. Absent advisory fee reductions and expense reimbursements, the expense ratio (gross) would be 0.96% for the Fund's current fiscal year. The net expense ratio is applicable to investors.

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end is available on the Fund's web site and by calling 1-800-366-3863.

Mutual fund investing involves risk. Principal loss is possible. Investments by the Fund in lower-rated and non-rated securities present a greater risk of loss to principal and interest than higher-rated securities. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities.

ICE BofA 1-3 Year BB US Cash Pay High Yield Index is a subset of ICE BofA US Cash Pay High Yield Index including all securities with a remaining term to final maturity less than 3 years and rated BB1 through BB3, inclusive. ICE BofA 1-3 Year US Corporate Index is a subset of ICE BofA US Corporate Index including all securities with a remaining term to final maturity less than 3 years. ICE BofA 1-3 Year US Treasury Index is a subset of ICE BofA US Treasury Index including all securities with a remaining term to final maturity less than 3 years. Index returns reflect the reinvestment of dividends and capital gains, if any, but do not reflect brokerage commissions or other expenses of investing. It is not possible to invest directly in an index.

The **30-day SEC yield** is based on dividends and interest earned by the Fund, and not on the dividends paid by the Fund, which may differ and are subject to change. **Average maturity** is the weighted average of all the current maturities of the securities in the Fund. **Duration to worst** is the duration of a bond using the nearest call date or maturity, whichever comes first. **Yield to worst** measures the lowest possible yield that can be received on a bond with an early retirement provision.

Quality ratings reflect the credit quality of the underlying securities in the Fund's portfolio and not that of the Fund itself. Quality ratings are subject to change. S&P Global Ratings assigns a rating of AAA as the highest to D as the lowest credit quality rating.
